# GONZALO SANCHEZ

---

## FULL STACK WEB DEVELOPER

### PRESENTATION

👋 Hello! I'm Gonzalo, a passionate full-stack developer. I was born in the department of Treinta y Tres, but I currently reside in Montevideo. Some time ago, I discovered my passion for programming, which led me to self-learn technologies like HTML, CSS, JavaScript, Node.js, Python, and MySQL. I received my full-stack development training through a bootcamp at Senpai Academy, which allowed me to strengthen my skills and my ability to work in a team. I am charismatic and easily connect with others. My observant and proactive nature enables me to learn quickly and pay attention to details. I have a B2 level of English and seek balance in my life by enjoying time with friends, reading, and watching series.

### COMPUTER SKILLS

#### Frontend:

HTML | CSS | JavaScript → React

#### Backend:

Python | NodeJS → Express

#### DataBase:

MongoDB | MySQL | PostgreSQL → Knex

#### Frameworks:

Bootstrap | Mantine | Flask

#### Tools:
